## **DETAILED ACTION**

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Claims 1-11, 17-34 and 36-41 are allowable over the prior art of record. The closest prior art of record Heckel, teaches that items in an array are marked from removal when there is a match, however it fails to teach that the items are actually physically removed whenever there is a match as claimed by the Applicant. The reasons for allowance of these claims are that the prior art of record neither anticipates, nor renders obvious the recited combination as a whole, including the limitations being indicated in independent claim 1 as "removing, in response to the match between the hash value of the selected entry and the hash value of the entry in the hash table, the hash value of the entry from the hash table", in claim 17 as "means for removing, in response to the match between the hash value of the selected entry and the hash value of the entry in the hash table, the hash value of the entry from the hash table", in claim 19 as "program instructions that remove, in response to the match between the hash value of the selected entry and the hash value of the entry in the hash table, the hash value of the entry from the hash table", in claim 20 as "removing, in response to locating the hash value entry from the second data set in the hash table, the hash value entry from the hash table", in claim 21 as "removing, in response to determining that the hash value of the second data set is identical to the hashed value in the hash table, the identical hashed value from the hash table", in claim 22 as "removing from the hash

table, in response to determining that the hashed value of the selected entry of the second data set is in the hash table, the hashed value of the selected entry of the second data set", in claim 32 as "remove from the hash table any hash value which matches any hash value of the source directory and the destination directory", in claim 36 as "remove any entry from the hash table which matches any hash value of the destination directory", and in claim 37 as "removing from the hash table, in response to determining that the hashed value of the selected entry of the second data set is in the hash table, the hashed value of the selected entry of the second data set".

Dependent claims 1, 17, 20-22, 32 and 37 are allowable at least for the reasons recited above including all the limitations of the allowable independent base claim upon which they depend.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
